

AVENTURA SAILING ACADEMY

COURSE SCHEDULE

Spring 2010

Our **Basic** course consists of 21 hours of instruction designed for the student with limited or no experience in sailing and will qualify members for chartering. Included are 9 hours of classroom lecture emphasizing nautical terminology, aerodynamics of sail, boating safety, rules of the road, radio procedure, anchoring and heavy weather survival. In addition, students exercise practical sailing skills in 12 hours of lab sessions aboard 25ft to 30ft boats, with emphasis on sailing maneuvers, docking procedures and "man-overboard" recovery techniques. An additional 2 hour lab emphasizing Aventura charter policies, boat systems, and safety is given to members. Complete course content and objectives are detailed on reverse side of this schedule.

Our **Intermediate/Advanced** course is designed for the student with experience on 30ft keelboats with inboard engines and wheel steering. It includes 12 hours of classroom lectures and 12 hours of on-the-water instruction and will qualify members for chartering boats 32ft to 36ft. Topics covered in the course include advanced sailing techniques, sail shape and trim, docking, mooring and anchoring procedures, night navigation, marine electronics, heavy weather seamanship and use of the sextant in navigation.

In our **Navigation and Coastal Piloting** course, students are introduced to navigation of coastal areas, including use of a chart, planning a cruise, dead reckoning a position and fixing a position by means of a compass and two landmarks. Also covered is navigation under conditions of reduced visibility, reading navigational aids, use of a GPS and position plots when only one landmark is observable.
